BRUNO GARCIA

DEVOPS & CLOUD ENGINEER | SOFTWARE ENGINEERING

Porto, Portugal | +351 936 033 160 | brunogarcia86@gmail.com | linkedin.com/in/brunogarciadev/

PROFESSIONAL SUMMARY

Cloud and DevOps-focused software engineer with 12+ years of experience in backend development, cloud infrastructure and delivery automation. Hands-on experience with AWS and Microsoft Azure, including Kubernetes, Docker, Helm, CI/CD and Infrastructure as Code (CloudFormation). Built containerised microservices and serverless APIs using Node.js, Python, AWS Lambda, API Gateway and DynamoDB. Worked on automotive and electric-vehicle charging systems, combining application engineering depth with cloud-platform delivery.

TECHNICAL SKILLS

Cloud Platforms & Services: Amazon Web Services (AWS), Microsoft Azure, AWS Lambda, Amazon API Gateway, Amazon DynamoDB

Infrastructure & DevOps: Kubernetes, Docker, Helm, AWS CloudFormation, Infrastructure as Code (IaC), CI/CD, microservices, serverless architecture

Programming & Frameworks: Python, Node.js, JavaScript, Django, React, Vue.js

Engineering Tools: Git, GitHub Enterprise, GitHub Copilot, Jira, Confluence; unit testing with Jasmine and Karma

Databases & Integrations: DynamoDB, MongoDB, MySQL, REST APIs, JSON

PROFESSIONAL EXPERIENCE

Critical TechWorks | Software Developer (Cloud & DevOps Focus)

Porto, Portugal | Oct 2018 – Present

- Implemented Node.js microservices supporting electric-vehicle charging infrastructure and vehicle energy-management capabilities on Microsoft Azure.
- Used Kubernetes, Docker and Helm to package and deploy containerised services within continuous integration and continuous delivery (CI/CD) workflows.
- Provisioned AWS cloud infrastructure using CloudFormation, applying Infrastructure as Code (IaC) practices to serverless applications.
- Developed Python-based AWS Lambda functions integrated with API Gateway and DynamoDB, alongside React front-end components.
- Worked across application development and cloud engineering for automotive services, supporting backend architecture, deployments and operational needs.
- Selected project: BMW Connected Home Charging (2022), focused on intelligent at-home electric-vehicle charging in Europe.

LTPLabs | Backend Developer

Portugal | Feb 2018 – Sep 2018

- Coordinated development and maintenance of client applications while owning backend delivery across multiple projects.
- Built Python/Django applications, managed AWS cloud infrastructure and contributed to Vue.js front-end development.

PROFESSIONAL EXPERIENCE (CONTINUED)

MOG Technologies | Software Developer / Front-end Developer

Portugal | Jun 2017 – Dec 2017

- Delivered product features and custom plugins using JavaScript, Backbone.js, Ractive.js, Node.js, C#/.NET MVC and MongoDB.
- Implemented front-end unit tests with Jasmine and Karma to support software quality.

Webcomum Consultoria | Web Developer / Front-end Developer

Portugal | Apr 2014 – Jun 2017

- Developed web applications using PHP, JavaScript, AngularJS, Node.js, MySQL and MongoDB, including external and Google API integrations.
- Created responsive interfaces with Bootstrap and CSS/SASS and applied technical SEO practices.

ADDITIONAL EXPERIENCE

Design Architecture Revolution & Kolor | Developer Intern | Jan 2014 – Apr 2014

Built an online store with PHP, MySQL, JavaScript and Bootstrap during a curricular internship.

Portuguese Air Force | Air Police | 2004 – 2011

Served in operational security roles, including a deployment to Afghanistan and a security-chief assignment in Madeira.

EDUCATION

University of Aveiro | Specialisation Course in Technological Development of Multimedia Products, 2014 (2011–2014)

SELECTED TRAINING

DataCamp | Intermediate Python for Data Science; Intro to Python for Data Science; Python Data Science Toolbox (Parts 1 and 2), 2018

Additional technical training | Python & Django; Advanced Node.js; Node.js, Express & MongoDB, 2018

LANGUAGES

Portuguese (native) | English
